CONT. of 09/988,379

Docket No.: 66376-328-7

IN THE CLAIMS:

1-27 (Cancel).

- 28. (New) A method of operating an internal combustion engine with a variable valve train for a cam-actuated lifting valve, including the steps of hydraulically activating the lifting valve and providing an additional lift during a mechanical lifting phase performed by the cam.
- 29. (New) A method of operating an internal combustion engine with a valve train for a cam-actuated lifting valve, including the step of hydraulically reopening the lifting valve at least once after a mechanical lifting phase performed by the cam has ceased.
- 30. (New) A method of operating an internal combustion engine with a valve train for a cam-actuated lifting valve, including the steps of alternatingly mechanically and hydraulically determining lifts of subsequent charge exchange processes.
